Welcome

Dear colleagues,

It is a great pleasure and honour to welcome you to the 33rd Annual (virtual) Conference of the European Association of Labour Economists (EALE) hosted by the University of Padova. The Department of Economics and Management “Marco Fanno” of the University of Padova is excited to be your virtual host for this year’s conference as we work to keep our community connected through these unprecedented times.

The Department of Economics and Management of Padova is one of the youngest Departments in an ancient European university, which dates back to 1222. It offers one of the best Economics and Management degrees in Italy according to Censis, a leading Italian think tank and it is also a Department of Excellence endowed with special funds by the Ministry of Education.

This year we are very proud to host Fabiano Schivardi, (LUISS University, Rome, Italy), Imran Rasul, (University College London, United Kingdom), and Maia Güell, (University of Edinburgh, United Kingdom) as keynote speakers. Three exciting invited Flash Talk sessions are on the program covering the following topics: Mental Health and the Labour Market, What future for Vocational Education? and Covid-19 and the Labour Market.

The programme committee selected 403 research papers out of 743 submissions. These papers will be presented in 78 parallel sessions and in 2 poster sessions. Note that this year we also have 4 job market sessions. In these sessions our Job Market Candidates will present their Job Market papers. They will furthermore present themselves during the Meet & Greet event organized on Saturday morning.

We all of course preferred to welcome you live in Padua. However, given the ongoing pandemic situation, we were forced to postpone an ‘in person’ conference. We all hope to welcome you in Padua in the very near future.

For now we have tried to offer you several cultural on line events to give you an impression of Padua and its cultural environment. We hope you will attend and enjoy our very promising social on line events.

Sincerely yours,

- **Giorgio Brunello**, Professor, Department of Economics and Management, University of Padova (chair)
- **Guglielmo Barone**, Associate Professor, Department of Economics and Management, University of Bologna
- **Marco Bertoni**, Associate Professor, Department of Economics and Management, University of Padova
- **Elisabetta Lodigiani**, Associate Professor, Department of Economics and Management, University of Padova
- **Lorenzo Rocco**, Professor, Department of Economics and Management, University of Padova

Friday 17 September 2021, 10.45 – 10.55 CEST

Junior network sessions

Friday, 17 September 2021, 11.00 – 12.00 CEST

Early career researchers will also have the opportunity to participate in more informal sessions where they can meet other early career researchers. Session hosts and participants are very flexible in what conversations could be about and leave them the freedom to launch topics of discussion. Examples could be discussing experiences during the conference, talk about interesting papers and any other issues that might be interesting/of interest to them. Hosts can also assign smaller groups into breakout rooms if they would like to encourage smaller group discussions. Registered participants for this session will be randomly assigned to a host.

Session hosts

1. Debdeep Chattopadhyay (University of Padova, Italy)
2. Fabrizio Colella (University of Lausanne, Switzerland)
3. Matthew Collins (Lund University, Sweden)
4. Bart de Koning (Maastricht University, Netherlands)

2. What Future for Vocational Education

Vocational education is often considered to be a solution to youth joblessness and the shortage of skills in fast-growing technical and professional jobs. Yet, while investing in high-quality vocational education might ease the school-to-work transition, some studies warn against programs that focus too narrowly on vocational education as this could hamper workers' ability to adapt to new technologies and change jobs later in life.

The organization of vocational education differs markedly across countries, including career and technical education in the US, dual apprenticeships in Germany and the school based secondary or post-secondary systems of Britain, France and Southern Europe.

What is the role of vocational education in an economic environment characterized by globalization, population ageing and technological progress? How are national systems adapting to these macro trends? What are the strengths and weaknesses of vocational education?

<p>Hier Padua image (zie sponsor website)</p>	<p>Department of Economics and Management The Department of Economics and Management of Padova is one of the youngest Departments in an ancient European university, which dates back to 1222. It is one of the leading research institutions in Italy in the fields of Economics and Business and offers a strong research environment. The Italian Ministry of Universities and Research has recently recognized us among the "Departments of Excellence 2018-2022". Nationally, the latest research assessment exercise ranks us first in the scientific areas of economics, business and statistics among medium size universities. Internationally, the QS World University Rankings ranks us among the top 101-150 departments and the Times Higher Education ranks us top 201-250.</p>
