Welcome

Dear colleagues,

It is a great pleasure and honour to welcome you to the 29th Annual Conference of the European Association of Labour Economists (EALE) at St.Gallen University.

This year we are very proud to host Hilary Hoynes (University of California, Berkeley) and Josef Zweimüller (University of Zurich) as keynote speakers. Two exciting invited sessions are on the program: one on empirical labour economics with large data and the other on the labour market of older workers. The programme committee selected 407 research papers out of 721 submissions. These submissions originated from 52 countries around the world. 280 of them will be presented in 72 parallel sessions and 115 in 5 poster sessions. Note that this year we also have four job market sessions.

We hope that you will have some time to enjoy the city of St.Gallen. Interesting highlights are the abbey district (UNESCO World Heritage Site) and the historic city with its 111 oriels. The elaborate carvings display the successes of St.Gallen's textile tradesmen around the world. In addition, St.Gallen has some culinary specialities to offer. Try the typical grilled St.Galler Bratwurst which consists of veal and pork, as well as bacon and milk.

We wish you an inspiring and pleasant time in St.Gallen. Don't hesitate to contact us or our staff for any query you might have.

About your EALE host

University of St.Gallen (HSG)

The University of St.Gallen (HSG) is the university of the Canton of St.Gallen and Switzerland's leading business university. Internationality, practical relevance and an integrative focus have distinguished the HSG's programmes since its inception in 1898. Today, about 8,400 students from 87 countries are enrolled in business administration, economics, law, social sciences and international affairs.

The HSG is consistently recognized as one of Europe's leading business schools. In 2016, the university was ranked fifth in the Financial Times European Business School Ranking. The university is internationally also recognized for its integrative education on the highest academic level with EQUIS and AACSB accreditation.

Degrees are offered on the Bachelor's, Master's and Ph.D. levels. In addition, the HSG offers first-rate, comprehensive executive education programmes for approx. 5,000 participants annually. The research incubators at the university are its 41 institutes, research units and centers, which constitute an integral part of the university. Primarily self-supporting and autonomously organized, the institutes remain closely connected to the university system

The university as place of architecture and art

The university building is regarded as important piece of architecture for the time period of the 1960s. It is an example of so-called brutalism following Le Corbusier, with construction and material being uncompromisingly visible.

The University of St.Gallen is not only an educational institution but also a much recognized place of the art: 46 artworks by Arp, Giacometti, Miró, Richter, Burckhardt, Tàpies, and many others can be found on campus. The artworks are integrated into the architecture and the students' everyday life. Almost all pieces have been created by the artists for their respective place of exhibition. This creates a dialogue of art and architecture that is present in all buildings.

The Social Safety Net as an Investment

Hilary Hoynes, University of California Berkely

Introduction/Chair: Christian Dustmann, University College London, UK

Hilary Hoynes is a Professor of Economics and Public Policy and holds the Haas Distinguished Chair in Economic Disparities at the University of California Berkeley. She is the co-editor of the leading journal in economics the American Economic Review.

Hoynes specializes in the study of poverty, inequality, food and nutrition programs, and the impacts of government tax and transfer programs on low income families. Current projects include evaluating the effects of the access to the social safety net in early life on later life health and human capital outcomes, examining the effects of the Great Recession on poverty and the role of the safety net in mitigating income losses, and estimating the impact of Head Start on cognitive and non-cognitive outcomes. Her work has been published in leading journals such as the American Economic Review, the Review of Economics and Statistics, the American Economic Journal: Economic Policy and Econometrica.

Currently, Professor Hoynes is a member of the American Economic Association's Executive Committee, the Federal Commission on Evidence-Based Policy Making, and the advisory committee of the Stanford Institute for Economic Research. In 2014 she received the Carolyn Shaw Bell Award from the Committee on the Status of the Economics Profession of the American Economic Association. In addition to her faculty appointment, Hoynes has research affiliations at the National Bureau of Economic Research, the UC Davis Center for Poverty Research and the Institute for Fiscal Studies. Previously, she sat on the Advisory Committee for the National Science Foundation, Directorate for the Social, Behavioral, and Economic Sciences and the National Advisory Committee of the Robert Wood Johnson Foundation Scholars in Health Policy Research Program and was Co-Editor of the American Economic Journal: Economic Policy.

Hoynes received her PhD in Economics from Stanford in 1992 and her undergraduate degree in Economics and Mathematics from Colby College in 1983. Prior to joining the Goldman School she was a Professor of Economics at UC Davis.

Guided city tour St.Gallen and visit Abbey Library

Friday, 22 September 2017, 18.30 – 20.00

Gathering point:

📍 09 Library Foyer ground floor

- We leave at 18.30 sharp!
- Vouchers for joining this tour are available at the registration desk. The additional costs for the tour are CHF 20 or Euro 20.(only cash). The guide will collect your voucher.

After the tour you can arrange your own dinner plans in one of the local restaurants in St.Gallen.

Abbey of St Gall

The Convent of St Gall, a perfect example of a great Carolingian monastery, was, from the 8th century to its secularization in 1805, one of the most important in Europe. Its library is one of the richest and oldest in the world and contains precious manuscripts such as the earliest-known architectural plan drawn on parchment. From 1755 to 1768, the conventual area was rebuilt in Baroque style. The cathedral and the library are the main features of this remarkable architectural complex, reflecting 12 centuries of continuous activity.

In addition to the architectural substance, the inestimable cultural values conserved at the Abbey are of exceptional importance, notably: the Irish manuscripts of the 7th and 8th centuries, the illuminated manuscripts of the St Gall School of the 9th and 11th centuries, documents concerning the history of the origins of Alemannic Switzerland as well as the layout of the convent during the Carolingian era (the only manuscript plan of that time remaining worldwide, conserved in its original state, representing a concept of monastic organisation of the Benedictine order).

City Lounge – Red Square

The first public lounge in Switzerland spreads out in the St. Galler Bleichi district in the open air. It is covered in red rubber granulate and is lit by artistic lighting elements. The “city lounge” invites you to relax and marvel. The St. Galler Bleichi district is a typical shopping and office area. That there are nevertheless still people out and about until late in the evening is thanks to the airy sitting room designed by the multimedia artist Pipilotti Rist together with the architect Carlos Martinez. The great Red Square is furnished with sofas, chairs, tables, couches and a Porsche – which, like the ground, are covered in a bright red carpet of plastic granulate.

During the day, children use the unusual city landscape for play while the employees from the surrounding businesses take breaks on the comfortable seating. In the evening, lighting elements which hang above the square like floating boulders light the scene and draw the young and young at heart into their light.

Meet and Greet Breakfast Job Market Candidates

Saturday, 23 September 2017, 08.00 – 09.00

At the annual conferences, EALE will facilitate in job market sessions that offer job market candidates whose research is in the field of Labour Economics, a platform for presenting their job market paper. This presentation also enables candidates to prepare for the US Job Market. During the conference we also organize a meeting moment where job market candidates and conference participants can meet and greet in an informal way.

For organisational reasons you are requested to register for attending this 'Meet and Greet Breakfast' by sending an e-mail to eale-sbe@maastrichtuniversity.nl. After your registration you will receive details on the location of this event.

If you wish to hold interviews during the EALE conference with one of our candidates you should get in touch with eale-sbe@maastrichtuniversity.nl.

Unemployment Insurance and the Labor Market

Josef Zweimüller, University of Zurich, Switzerland

Introduction/Chair: Michael Lechner, Swiss Institute for Empirical Economic Research
University of St.Gallen, Switzerland

Josef Zweimüller is Professor of Macroeconomics and Labor Markets at the University of Zurich. He received his PhD in 1989 from the University of Linz, Austria, and was a member of the Economics Department in Linz until 1995. He was a post-doctoral researcher at Berkeley and Stanford during 1991–1993 and an Assistant Professor of Economics at the Institute of Advanced Studies in Vienna during 1995–1997. In March 1997 he joined the Economics Department at the University of Zurich.

His research focuses on the impact of welfare state programs on the labor market. He has worked on the effect of unemployment insurance on unemployment durations and other labor market outcomes; the effect of parental leave policies on fertility and employment careers after childbirth; and the effect of reforms to disability-insurance and public-pension systems on labor supply and retirement behavior.

In recent projects, he studies the effect of immigration on labor market and political outcomes, the effect of family policies on the gender earnings gap, the role of severance pay for equilibrium unemployment, and the determinants of vacancy durations and entry wages.

His research has been published in various international journals, including the Quarterly Journal of Economics, the American Economic Review, the Review of Economic Studies, the Journal of Labor Economics, the American Economic Journal: Economic Policy, and the Journal of Public Economics, among others.

Josef Zweimüller is a research fellow of CEPR London and was co-director of the CEPR Labour Economics programme during 2009–2015. He is also a member of the IZA and CESifo research networks.

EALE Prizes

EALE Best Poster Award

EALE grants an award for the best poster presented at the conference. This prize is awarded by a jury to the best designed poster presented at the conference. A jury consisting of 4 members of the Executive Committee of EALE will evaluate the quality of the posters using mainly the following three criteria: clarity, self-explanatory and layout. The prize is € 500.

Prize Committee: Stijn Baert, Andrew Clark, Erik Plug, Núria Rodriguez-Planas

EALE Young Labour Economist Prize

The prize of € 500 is available for a single authored paper written by someone who has no PhD or received a PhD no longer than 3 years ago. A jury consisting of the EALE president and two additional Executive Committee Members of EALE will judge the accepted and presented papers eligible for this competition.

Prize Committee: Christian Dustmann, Sandra McNally, Andrea Weber

Elsevier/Labour Economics Prizes

Prize for the best article in Labour Economics

The editors of Labour Economics select annually a winner of the “EALE Labour Economics Prize” for the best paper published in Labour Economics during the previous year. The prize is € 1,000 (sponsored by EALE) and the Handbooks of Labor Economics (3 volumes) or an Amazon cheque at an equivalent value (sponsored by Elsevier).

Prize winner 2017

The editors of Labour Economics are pleased to announce the 2017 winner of the 11th “EALE Labour Economics Prize” for the best paper published in Labour Economics during 2016:

Family migration and relative earnings potentials

Mette Foged, University of Copenhagen

Labour Economics 42 pp. 87-100

The paper has been selected by the editors as the 2017 winner of the annual “EALE Labour Economics Prize” for the best paper published in 2016. The paper studies the role of relative earnings potentials for family migration decisions. The panel found the paper was a very nice blend of theory and empirical evidence using unique data allowing for a reconstruction of

family ties among both internal and international migrants. Contrary to much of the existing literature, the author finds that gender-neutral family-migration cannot be rejected against husband-centered migration, which the panel considered to be a novel and intriguing finding.
